TOUGH ON THE INSIDE

CraftMaster products are manufactured using advanced panel technology, wood fiber, and environmentally safe resins to create precisely engineered wood products that perform better than solid wood counterparts. A CraftMaster door facing is made from an engineered wood fiber mat that is moulded under intense heat and pressure into a 3.2 mm thick sheet of high-density fiberboard. The result assures consistent quality from door to door, room to room, home to home.

GET THE DOOR THAT ENDURES

- Allows homeowners to achieve consistent quality throughout the home
- Resists shrinking, swelling, cracking and joint separation
- Long lasting with low maintenance
- Make doors a more profitable upgrade by offering the full CraftMaster line
- Engineered wood designs outperform wood doors while offering superior value

Choose from four prestained colors

CraftMaster Natural®

CraftMaster Mesa™

CraftMaster Canyon™

CraftMaster Harvest®

SPECIFY THE DOOR THAT MAKES THE GRADE

- Tested for water resistance, adhesion and overall durability to ensure product quality

Due to the use of a protective topcoat sealer, prestained and finished white door designs cannot be repainted without fully removing the topcoat sealer.

No old growth timber is harvested for the manufacture of CraftMaster designs. Instead, by-products from sawmill operations are used to convert wood chip waste into a design of true beauty.
