

Crossmore 6'8"

## Crossmore® 6'8", 7'0"

The clean, flat design and smooth finish of the CraftMaster Crossmore was inspired by trends in today's kitchen and bath cabinetry. These trends showcase a growing consumer preference for simple, straight lines and flat panels that reflect traditional Craftsman architecture and the beautifully simplistic Mission-style furniture. The flat-panel door design is a classic look that offers authentic style and character, while also appealing to a broad range of home styles and design tastes.

We're door people.

# Crossmore

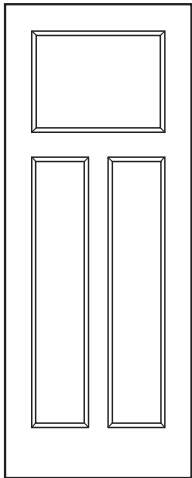

## Crossmore offers revolutionary flat panel technology in a classic three panel design.

- Clean flat panel design is both classic and modern.
- Created through advanced molded door technology to deliver a truly authentic, flat panel door.
- Available in 6'8" and 7'0" heights in passage and bifold sizes and in solid core construction only.
- Elegant smooth finish.
- All doors are available primed and ready to paint.
- CraftMaster molded doors are covered by a 5-year limited warranty.

\* Check with your supplier for availability.  
Trimming CraftMaster molded doors will void the warranty.

- Colonist, Carmelle, and Classique are also available in Pre-Finished White.
- Colonist Textured also available in four Pre-Stained finishes.

### SPECIALTY DOORS

## Green Benefits

- CraftMaster molded door designs have no added urea formaldehyde. This is certified by Scientific Certification Systems, certificate number SCS-MC-01802.
- Due to their physical composition, CraftMaster molded door designs are not subject to the California Air Resources Board's (CARB) Airborne Toxic Control Measure 93120 (ATCM). This measure enforces limits on formaldehyde emissions. If they were subject to the ATCM rule, CraftMaster molded door designs would meet the specification for the designation "ultra low formaldehyde emitter."
- Through repeated testing by the Composite Panel Association (CPA), a third party certifier for the ATCM rule, CraftMaster molded door designs have demonstrated formaldehyde emissions equivalent to background levels found in the environment.
- CraftMaster molded door designs contain a minimum of 63% by weight, pre-consumer recycled content. This is certified by Scientific Certification Systems, certificate number SCS-MC-01801.
- CraftMaster products are primed with a low VOC primer. This primer is among the most environmentally preferable of all coatings available.
- CraftMaster molded door designs contribute to industry programs such as LEED® for Commercial Interiors, LEED for New Construction and Major Renovations, LEED for Homes and NAHB - National Green Building Standard™.

## Choose CraftMaster

**ENHANCE INTERIORS.** Use doors as an integral part of interior design. Add style, elegance and decorating consistency to your projects.

**HASSLE-FREE PERFORMANCE.** No cracking or panel separation due to seasonal humidity changes means no repainting or replacing.

**SUPERIOR VALUE.** Compelling design and customization opportunity at a significant value versus solid wood or flush doors.
